MYSLUB (White to white)

MYSLUB is a long slub yarn with 3 material. Each material absorb different dyestuff.

MYSLUBW-001C : 81% COTTON + 13%POLYESTER + 6%ACRYLIC

MYSLUBW-002C : 81% RAYON + 13%POLYESTER + 6%ACRYLIC

Kongkiat has developed new technique to develop three layers of materials in one signal yarn. Customer can dye the fabric to make 2 tones or 3 tones fabric. MYSLUB has long slub with uneven streaky effect. Some customer call it marble like effect. The slub is longer than regular slub with minor different in yarn count. The effect is completely random without any patterning effect.

Customer can knit MYSLUB yarn then processing fabric dye.

MYSLUB can be dyed in

Reactive dyed : cotton part only

Disperse dyed + Bleach cotton : polyester part AND acrylic part (This create two tone color)

Two part dyed (Reactive + Disperse) : cotton part , polyester part and acrylic part

Basic dyed : acrylic part only

All of MYSLUB yarn in this catalogue are knitted with loose gauge knitting machine .

For NE30, we recommend using 24 gauge knitting machine. Customer can design their own color and ask our sale representative to create lab dip or dyeing guide.
